Marking Torque Wrench for Hexagon Socket Cap Screw

CMQSP

PAT PEND.

Automatically marks screw and work piece with paint when tightening is completed

- Prevent missed tightening by automatically marking fastener with paint when torque set is achieved
- For Hexagon Socket cap screws M6~M12 JISB1176/ISO4762/DIN912
- Easy to identify loosening since mark is made on fastener and work piece

Your Torque Partner
Features

- Marking can be done when hexagon socket cap screw tightening completed
  - To prevent mistightening
  - Eliminate manual paint marking
- Verify bolt loosening
- Confirm proper torque tightening
  - Paint mark proves the screw was tightened to the set torque
- Approx. 3,000 marks per refillable marker cartridge
- Durable paint mark dries quickly and cannot be removed without the use of solvent
- Suitable for Hexagon socket cap screws JIS B1176/ISO4762/DIN912 M6~M12
  - Applicable for screw heads on top when marker position is adjusted
  - Contact us for Paint Marking for special shaped head
